

15x15
design v.2

* the new design features rounder edges since they are more pleasing to look at and we've ~~ditch~~ ditched the whole modular idea.

instead of ~~mod~~ modularity we would start by having 3 ~~pro~~ planter tiles:

1. 15x15cm tile

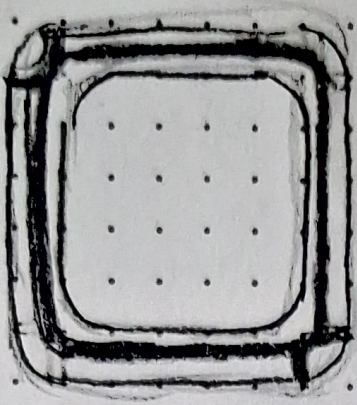

2. 30x30cm tile

3. 50x50cm tile

they would vary only slightly in price

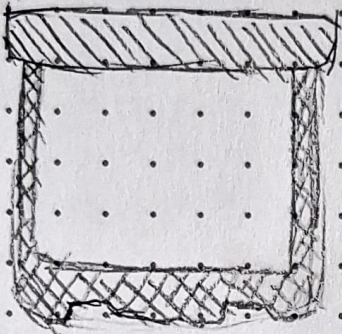

we would also need a rack ~~pro~~ probably?

top view

tubing is now much more simple allowing for better flow and a smaller BOM.

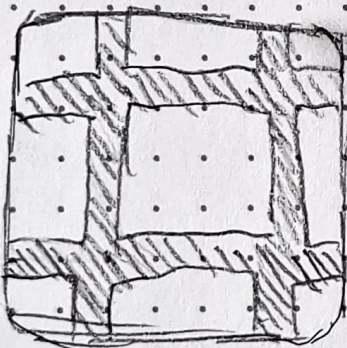

side view

 - original plan for space for electronics

 - where we can add more space for electronics

bottom view

 - indent for tiles to slide onto racks
